

IELTS with Kee - May 28

🎯 考点线索 (Cues)	📝 笔记与纪要全解析 (Notes)
词汇辨析 (Trophy vs. Medal)	🧠 课堂内容还原 (Class Content) • [实体差异]：Trophy 侧重指立体的“奖杯”，而 Medal 则是指扁平的“奖牌”。 • [语境差异]：Trophy 经常用于团队合作 (Teamwork) 的最高荣誉或重大赛事的冠军奖励。 🌱 必备语块 (B2 Chunks) • get a trophy for teamwork - 因团队合作获得奖杯 (例句: You want to get a trophy for your teamwork.) • a cooperative person / team player - 有合作精神的人/团队参与者 (例句: I'm not a very cooperative person, so I prefer individual tasks.) 💡 精髓解释 (Insight) 在口语中谈论成就时，精准区分三维立体的 trophy 和二维扁平的 medal，能向考官展示词汇精确度。
语法核心 (Modals & "Will")	🧠 课堂内容还原 • [可能性阶梯]：情态动词表可能性从低到高排序为：might < could < may < can < will < must。 • [Will 的主观情境]：表示临时起意的决定 (Instant decisions)、主动提供帮助 (Make offers)、以及给出承诺 (Make promises)。 • [客观必然]：单纯描述将来必将发生的客观事实 (如议会辩论的开场)。 • ⚠️ [写作避坑]：在雅思大作文中，will do 显得不够严谨，必须进行书面化替换。 • [Be about to 陷阱]：表示“马上/立刻要做某事”，其后绝不能加具体的时间点；否定形式 not about to do 意为“完全没这个打算/压根不想做”。 🌱 必备语块 • tell me all about it and I'll pass on the information - 把事情全告诉我，我会把信息传达给别人 (例句: Tell me all about it and I'll pass on the information to the rest of the team.) • make an offer / make a promise - 主动提供/做出承诺 (例句: We often use "will" to make offers and promises.) • be predicted / likely to do - 被预测/极可能做某事 (例句: The population is predicted to grow rapidly in the future.)
时态规则 (主将从现与时表将来)	🧠 课堂内容还原 • [一般现在时表将来]：有两种核心用法。其一是表示既定的时刻表 (如火车进站、会议安排、课程开始)。 • [主将从现]：在条件状语或时间状语从句中用一般现在时，主句用一般将来时。

	• [引导词雷达]：当听到或使用 when, as soon as, after, before, until, as long as 时，需立刻触发该语法条件反射。 🌱 必备语块 • as long as - 只要 (例句: As long as you study hard, you will achieve your goals.) • reap what you sow - 种瓜得瓜，一分耕耘一分收获 (例句: You will definitely reap what you sow if you put in the effort.)
语法矩阵 (16 Tenses Framework)	🧠 课堂内容还原 • [底层逻辑]：英语语法的“地基”是16大时态，由 4个时间节点 (Past, Present, Future, Past Future) × 4个基础形态 (Base/Simple, Progressive, Perfect, Perfect Progressive) 排列组合而成。 • [进行与完成]：Progressive (be doing) 强调动作正在进行；Perfect (have done) 强调动作已经完成并对某时刻产生了结果。 • [高阶应用 1]：将来完成进行时 (will have been doing) 强调动作从过去/现在持续到未来的某一个确切时刻。 • [高阶应用 2]：过去将来时 (would do / would be doing) 常用于描述平行宇宙或虚拟语气 (本来计划要做但没做成的事)。 🌱 必备语块 • by 4pm - 到下午四点为止 (例句: By 4pm, we will have been having classes for 2 hours.) • be learning phonetics changing - 正在学习音变现象 (例句: We would be learning phonetics changing if our grammar foundation were stronger.)
口语策略 (Part 2 Openers)	🧠 课堂内容还原 • [争取时间]：在 Part 2 答题初期，使用条件或时间状语从句作为开场白，可以自然拉长句子，为大脑检索素材争取宝贵时间。 • [情绪铺垫]：利用 as soon as 营造一种紧迫感和第一直觉，让表述更加生动自然。 🧠 救命拖延词 (Stalling) • As soon as I saw this topic, the first idea that came to my mind was... - [引入新话题的通用开场白，争取约4秒思考时间] (例句: As soon as I saw this topic, the first idea that came to my mind was my friend Michael.)
听力词汇 (S4 Weather & Inventions)	🧠 课堂内容还原 • [Gauge vs. Measure]：两者皆有“测量”之意。Measure 使用标准工具得出精确大小 (如尺子测身高、量杯量体积)；Gauge 往往在没有精确工具时，靠感觉或估计来进行定性判断 (衡量主观反应、兴趣程度、降雨量等)。 • [强调句抓答案]：It is/was ... who/that ... (Cleft Sentence) 是雅思听力极度偏爱的出题句式，重音往往落在核心考点上 (如 It was Franklin who...)。 🌱 必备语块

	• contribute to the development of - 促进了...的发展 (例句: This was one of many inventions that contributed to the development of weather forecasting.) • gauge the reaction - 评估/衡量反应 (例句: It's hard to gauge the audience's reaction without seeing their faces.) • verify the theory - 验证理论 (例句: His theory was verified by an English astronomer in 1686.) • make it possible for sb to do - 使得...成为可能 (等同于 enable) (例句: The telegraph made it possible for these records to be collated.)
听力逻辑 (总分综结构)	 课堂内容还原 • [Section 4 宏观脉络]: 学术讲座高频逻辑结构为“总-分-综”。 • [总 - 引入]: 用代词 (如 These / Many of these) 对前文进行同义替换和概括。 • [分 - 展开]: 引入新角度, 使用具体数字、年代 (如 in the 15th century)、举例 (one of the first...)、或细节词 (in particular) 来细化阐述。 • [综 - 戴帽子]: 讲影响和意义, 对讲过的具体例子进行拔高和总结 (如 This increasing ability to... helped scientists...)。⚠ 注意: 听到“戴帽子”的表述, 说明当前段落已终结, 必须立刻将目光下移至下一考点。  必备语块 • in particular / particularly - 尤其/特别 (作为总到分的过渡词) (例句: He carried out work on electricity and lightning in particular.) • identify a pattern - 识别规律 (等同于 discover) (例句: It was Franklin who identified that storms generally travel from west to east.)
